

MIDDE JAYANTH

Portfolio jayanthjay751@gmail.com +91 6303729478 [GitHub](#) [LinkedIn](#)

Professional Summary

Information Science and Engineering student (CGPA: 9.7) with strong foundations in full-stack web development and system design. Experience building production-grade applications using React, Next.js, Node.js, and the MERN stack. Developed multiple full-stack projects including AI-powered platforms with MongoDB, authentication systems, payment integrations, and real-time dashboards using Socket.io. Proficient in JavaScript/TypeScript, REST APIs, database design, and modern frontend frameworks. Comfortable with both client-side and server-side development. Seeking full-stack development internship to contribute to scalable web applications.

Education

B.E. – Information Science Engineering 2024 – 2028
Dayananda Sagar College of Engineering (DSCE), Bengaluru CGPA: 9.7/10.0

Technical Skills

Languages: JavaScript, TypeScript, Python, C, C++
Frontend: React, Next.js, Tailwind CSS, Material UI, HTML5, CSS3
Backend: Node.js, Express.js, FastAPI, Flask, REST APIs, JWT, RBAC
Databases: MongoDB, Firebase, SQL, Mongoose
Systems & Architecture: WebSockets (Socket.io), Circuit Breaker Pattern, Retry Logic, API Integration
DevOps & Tools: Git, GitHub, Docker, Vercel, Render, Postman

Projects

Indian Chess Academy – Full Stack Academy Platform [Live](#) — [GitHub](#)

Developed a production-ready academy management platform using Next.js, Node.js, and MongoDB with JWT-based authentication and RBAC. Integrated Razorpay payments, enrollment workflows, analytics dashboards, and structured API design to streamline academy operations.

PromptPilot – Full Stack SaaS Application [Live](#) — [GitHub](#)

Built a SaaS-style web platform featuring authentication, session history, daily credit logic, and structured backend APIs. Designed scalable architecture with MongoDB persistence, validation layers, and streaming responses within a modern React and Node.js stack.

SocialX – Real-Time Social Platform [Live](#) — [GitHub](#)

Engineered a full-stack social application using React, Node.js, and MongoDB with token-based authentication and REST APIs. Implemented real-time updates, pagination, filtering logic, and optimized UI rendering for consistent performance across devices.

TaskEngine – Backend-Focused Task System [Live](#) — [GitHub](#)

Designed REST APIs with validation, pagination, and filtering capabilities. Implemented secure authentication, structured database models, and a responsive React frontend for scalable task workflows.

Phoenix – Resilient Real-Time Architecture [Live](#) — [GitHub](#)

Implemented backend resilience mechanisms including circuit breakers, retry policies, and health monitoring in a Node.js system. Integrated monitoring dashboards and multi-channel alerting to maintain reliability during failures.

User-Level CPU Scheduler – OS Simulator [GitHub](#)

Developed a web-based CPU scheduling simulator implementing FCFS, SJF, Priority, Round Robin, and MLFQ with interactive Gantt chart visualization and performance comparison metrics.

ProxyPlay – Secure Streaming Backend [Live](#) — [GitHub](#)

Built an API-first video streaming backend with JWT authentication, short-lived playback tokens, rate limiting, and admin controls to ensure secure and scalable content delivery.

Achievements

Selected at Smart India Hackathon (College Level). Participated in 12+ national hackathons. Secured Top 3 in a hardware innovation challenge and achieved multiple Top 5 and Top 10 placements.

Additional Information

Core Competencies: Problem Solving, Analytical Thinking, Leadership, Communication, Adaptability
Languages: English (Fluent), Telugu (Native)
